

About Dana Pest Control

R. Dana Pest Control Corp. is a family owned and operated company that provides QUALITY service in customer satisfaction and pest elimination. For over 40 years we have been implementing customized programs for Restaurants, Building Supervisors, Superintendents of Buildings and Grounds as well as Governmental Municipalities and Hospitals throughout Westchester, Rockland and Bergen counties. Our pest management specialists are highly trained individuals that will implement their expertise in your establishment. You will receive the best individual attention from your Pest Management specialist each and every time service is provided. Our customized service evaluations are matched to your individual needs and expectations. We will develop a customized program that will best meet the needs of the premises being evaluated. Our friendly staff is always available for questions, service recommendations and service evaluations. Get on board and experience the type of service others rely on. We attach our name to every service we provide; therefore, it will be the best service you receive or the next service will be on us. This is the Dana Promise.

The Inspection

The Inspection is the FIRST, most important meeting that we will have in your establishment. The Dana Inspection is specially designed to help guide your organization through simple recommendations and corrections that will assist in safeguarding your facility from those unwanted invaders. If you are not already familiar with the Integrated Pest Management program, also known as I.P.M., our Pest Management Professionals will show you and your staff how to implement this program into your daily sanitation procedures. I.P.M. is considered Green Technology and required by governmental agencies to be used in all state institutions, schools, daycare facilities and healthcare organizations. Pest control doesn't come in a can anymore — it now has taken the form of continuous education and teamwork between you as the customer and your Pest Management Professional.

Site Inspection Reports

We have a variety of tools in the “Dana Toolbox” that we implement during our services depending on our customer type. Whether you're a restaurant, warehouse, healthcare facility, school, daycare, or perhaps a recreational facility such as a camp or country club, there is a form specially designed to meet your organization's needs. We will provide you with the tools to help us to determine your needs, provide you with a solution and, finally, a program that will best fit your organization. Site Inspection Reports are part of all service programs. These reports will become an integral part of your service and have proven to be indispensable to owners, supervisors and managers. These reports will assist you and provide your staff with sanitation procedures to follow that are guaranteed to decrease the conducive conditions that pests may be seeking in your facility.

Emergency Response

Our company is always available to respond to your concerns and questions. Our helpful and pleasant office staff can reach your Pest Management Professional, supervisor, or perhaps the owner, via Nextel radio. If you require assistance during non-business hours, holidays or weekends, simply call our answering service at 1-866-324-8391. Our answering service will contact your Pest Management Professional and your call will be returned as quickly as possible. We will supply emergency service whenever reasonably possible and will respond, if not the same day, within a 24-hour time period.

The Dana Guarantee

Our services are guaranteed effective. If an infestation arises due to our negligence, we will make it our mission to eliminate the problem at no extra cost to you. If, for whatever reason, you are not satisfied with your Pest Management Professional, we will simply train a replacement that you feel more comfortable working with. This is a team effort and it is our mission to make it work for all involved. The owner of Dana Pest Control prefers to inspect each commercial facility personally whenever possible, and is always available upon request.

Our individual custom programs will adjust according to a facility's needs. If more services are needed, those arrangements will be recommended and scheduled. When there seems to be a problem that is caused by structural soundness, it can sometimes prove impossible to eliminate certain invaders; however, you can be assured that they will be kept to the absolute minimum.

WE GUARANTEE IT!

No Obligation Service

Our services differ from any in the industry. Find out why; try us for three months and if you don't see a significant difference after working together in your pest control program, cancel and we will not hold you to any contract or service agreement. Why wait? You have nothing to lose except pests.
